PERSONAL AND CONFIDENTIAL

Dear Stan:

Delivered herewith please find our lists of additives. It is my understanding that these lists reflect the definitions that have been discussed among counsel with the following exception. List No. 3 shows additives calculated as a percentage of cut filler, not as a percentage of feed-stock ingredients. However, judging from Sam Witt's revised draft of conditions, I would expect that most others have also used the finished filler weight. I believe that every other aspect of the lists will be self-explanatory.

Out of an abundance of caution, permit me to re-emphasize the vitally sensitive nature of this information and urge you to convey this to your colleagues who will be working with you in analyzing it.

Of course, I am at your disposal.

Best wishes.

Sincerely,

Fred
